

# ZUTACORE HYPERCOOL™

## A sustainable, high-density cooling solution

### DIRECT-ON-CHIP, WATERLESS, TWO-PHASE LIQUID COOLING

- 3x processing capacity
- 0% risk of IT meltdown
- 50% less energy, 50% CAPEX reduction, 50% less space
- >1000W chip cooling
- Cuts cooling power infrastructure needed from server to data center
- Fast and easy retrofits for servers, near plug-and-play system
- Enables the design of new, higher density processors, servers and racks
- Data center shrinks, scarce energy, water, land and construction resources saved

## Waterless non-conductive liquid refrigerant
